

DRAFT Intended Agenda

Global Research-Policy Interface Climate 2015

Strengthening the Research-Policy interface in the international climate negotiations

**Side-event, Bonn, 9 June 2015 (Tuesday)
18:30-20:00, room Kaminzimmer (113)**

Inspired by the successful outcome of the 2014 edition, Climate Strategies and The Stanley Foundation organised a two-day Global Climate Policy Conference in New Delhi to explore new research ideas that can support climate negotiations on the way to Paris COP21 but also during the implementation phase in the years to come. This side event presents a snapshot of the outcome of the New Delhi discussions

Objective of the entire project: Identify roadblocks with potential significance for climate negotiations, the outcome of Paris and the post-2020 regime; and at the same time the areas where neutral, fact-based research and analysis can benefit the political process.

18:30 – 18:40

Welcome and Setting the Scene

Overview of the Global Climate Policy Conference 2015 – Michael Grubb, University College London
