1. Klimaforum Latinoamerica Network (KLN)
2. Climate Change in Colombia
3. NDC Implementation
4. Colombian Talanoa Dialogue Initiative
5. Conclusions
KLN is a research-action network that combines knowledge generation with the necessity to encourage debates and to promote new approaches on the climate crisis that society face.
We promote spaces for dialogue between society, the academy, business and local Governments to accelerate the transitions towards a low carbon economy.
ORGANIZATION APPROACH

1. We help our allies to incorporate climate issues into their business strategy.

2. We propose a comprehensive adaptation approach that increases the resilience of vulnerable communities to climate change impacts.

3. We seek to influence in the structural transformation of society in the period 2020-2050 through education.
AREAS OF WORK

- Education for sustainability
- Communication of climate crisis (2020-2050)
- Influence for transformations

Business
Governments
The academy
Civil Society
STAKEHOLDERS ENGAGEMENT

Climate Action: Non-state actors

- Universities
- Business community
- Media
- Civil society
- Local Governments
OUR PROGRAMS AND INITIATIVES

- Climate Action Program
- Energy and Climate Program
- Adaptation Base on Communities Program
- Education for Climate Action Program
- Corporate Climate Responsibility Initiative
- Colombian Talanoa Dialogue Initiative
CLIMATE CHANGE IMPACTS IN COLOMBIA
CLIMATE CHANGE IMPACTS IN COLOMBIA

- Ice loss: 374 Km² (1850) 45.3 (Km² 2015)
- Sea level rise: 2.5 mm/año
- Forest: 72,000 ha
- Temperature: 0.8 °C (1880-2015)
- Agriculture and livestock
- Human Health: Heat waves
Hydrometeorology phenomena 2010-2011
11 billion COP (2.2% GDP)

1.164.413 ha flooded

3.4 billones COP in airports and highways

305.000 millions COP in crops losses

Infraestructure impacts (sanitation) 500.000 millions COP
CLIMATE CHANGE PROJECTIONS IN COLOMBIA

- EL 100% DE LOS MUNICIPIOS DE COLOMBIA TIENEN ALGÚN GRADO DE RIESGO POR CAMBIO CLIMÁTICO.
- AL 2040 EL 25% (119 MUNICIPIOS) DEL TERRITORIO NACIONAL ESTÁ EN RIESGO ALTO Y MUY ALTO DE SUFRIR FUERTES IMPACTOS POR CAMBIO CLIMÁTICO.
- AL 2040 EL 59% (489 MUNICIPIOS) DEL TERRITORIO NACIONAL TIENE RIESGO POR CAMBIO CLIMÁTICO ENTRE MEDIO A MUY ALTO.
- LAS REGIONES DEL PAÍS CON MAYOR NÚMERO DE MUNICIPIOS EN RIESGO ALTO Y MUY ALTO POR CAMBIO CLIMÁTICO SON:
  1. ANDINA (36 MUNICIPIOS)
  2. AMAZONIA (31 MUNICIPIOS)
  3. PACIFICA (25 MUNICIPIOS)

2,8 – 3,0 °C

CAPÍTULOS IV, V, VI

COLOMBIAN TALANOA DIALOGUE INITIATIVE
To promote climate action of Colombian business sector with the aim to increase the ambition of mitigation and adaptation goals and commitments, within the framework of Paris Agreement and 2030 Agenda.
OBJECTIVES

Specific Objectives

1. To create interlocution spaces among governments and non-state actors with the purpose to encourage national climate action.

2. To facilitate the inclusion of leading companies in climate action in the NAZCA platform of the Lima-Paris Action Agenda.
OBJECTIVES

Specific Objectives

3. To design and develop a communication and information strategy that makes visible the climate actions of non-state actors in Colombia.

4. To encourage non-state actors in Colombia to generate sustainable value, shared value, a culture of sustainability and local development process.
INITIATIVE APPROACH

Colombian Talanoa Dialogue Initiative

Systemic

Climate Corporate Responsibility: Low carbon society

To establish a dialogue between Actors

Education for Sustainability as the driver of change

To increase climate action of non-state actors

Sharing learning and creation of alliances
Training and education for sustainability

Encourage, articulation and visibility of climate actions

Dialogue with companies presidents

COMPONENTS OF THE INITIATIVE

Dialogue
Innovative Solutions
Alliances
DEVELOPMENT PHASES

1. Dialogue Beginning (June 2018)
2. Actors articulation (August 2018)
3. Mitigation, adaptation and education commitments
4. Communication of the best practices and sectorial commitments
ONGOING ACTIVITIES: SECTORIAL CLIMATE CHANGE CHAIR

Climate governance and sustainability

Climate change and rural communities

Energy transitions and sustainable value
ONGOING ACTIVITIES: TRAINING CLIMATE CHANGE PROGRAMS

Business skills training program for climate action (February-July)

Teacher training program on climate action (August 2018)
To strengthen the capacities of community leaders on risk management and climate change in La Mojana Region, Colombia that allows the construction of resilient communities.

The 22 leaders trained will multiply the knowledge learned among their communities in the 11 municipalities of La Mojana Region.
**Objective**

To promote climate actions of Colombian business sector with the aim to increase the ambition of mitigation and adaptation goals and commitments, within the framework of Paris Agreement and 2030 Agenda.

To create interlocution spaces among governments and non-state actors with the purpose to encourage national climate action.

**Phase I**
Objective

To create alliances among non state actors with the aim to increase the ambition of mitigation and adaptation goals that allows to accomplish the Colombia’s NDC

12 September 2018

The results of the first and the second workshop will be part of one of the Colombian Submissions to Nazca Platform
Objective

To establish a dialogue space between companies, governments and the academy on climate action in Colombia.

COP Simulation from non state actor

Academic discussions

Cultural events

CAPÍTULOS IV, V, VI

CONCLUDING REMARKS
The education and research are key issues to face climate change and to support decision making process.

The Talanoa dialogue developed in Colombia shows that private sector is commitment with the reduction of GHG but their actions aren’t enough to accomplish the Colombia NDC.

To face climate change is not only in the charge of governments. Private sector play a key role in the process and Talanoa Dialogue has demonstrated that it’s possible to work together for the same goal.
